

The background is a dark, moody photograph of a wooden surface. On the left, a smartphone lies flat. In the center, a camera lens is positioned. To the right, a newspaper is spread out, showing headlines like 'HOCKEY' and 'GLARY'. In the top right corner, a bowl of food is partially visible. The title text is overlaid in the center in a large, white, sans-serif font.

The Korean Food (TKF) Restaurant Payment System

INTRODUCTION

INTRODUCTION

A console program is a program that operates through a text-based interface, such as a terminal or command line. It allows users to provide inputs and receive outputs through text interaction. In this project, a console program is developed to simulate **The Korean Food (TKF) restaurant payment system**.

Related Topics & Applications in Console Program Development

1. Function – Modularise and organise the program.
2. Array – Store multiple values of the same data type.
3. Data Structures – Store and manage different types of data efficiently.
4. File Processing – Create, read, update, and delete files in the system.

DESIGN

USER MANUAL

USER MANUAL

Open the source code, compile and run the `main.c` file

Select Option 1 or Option 2 to access the program features.

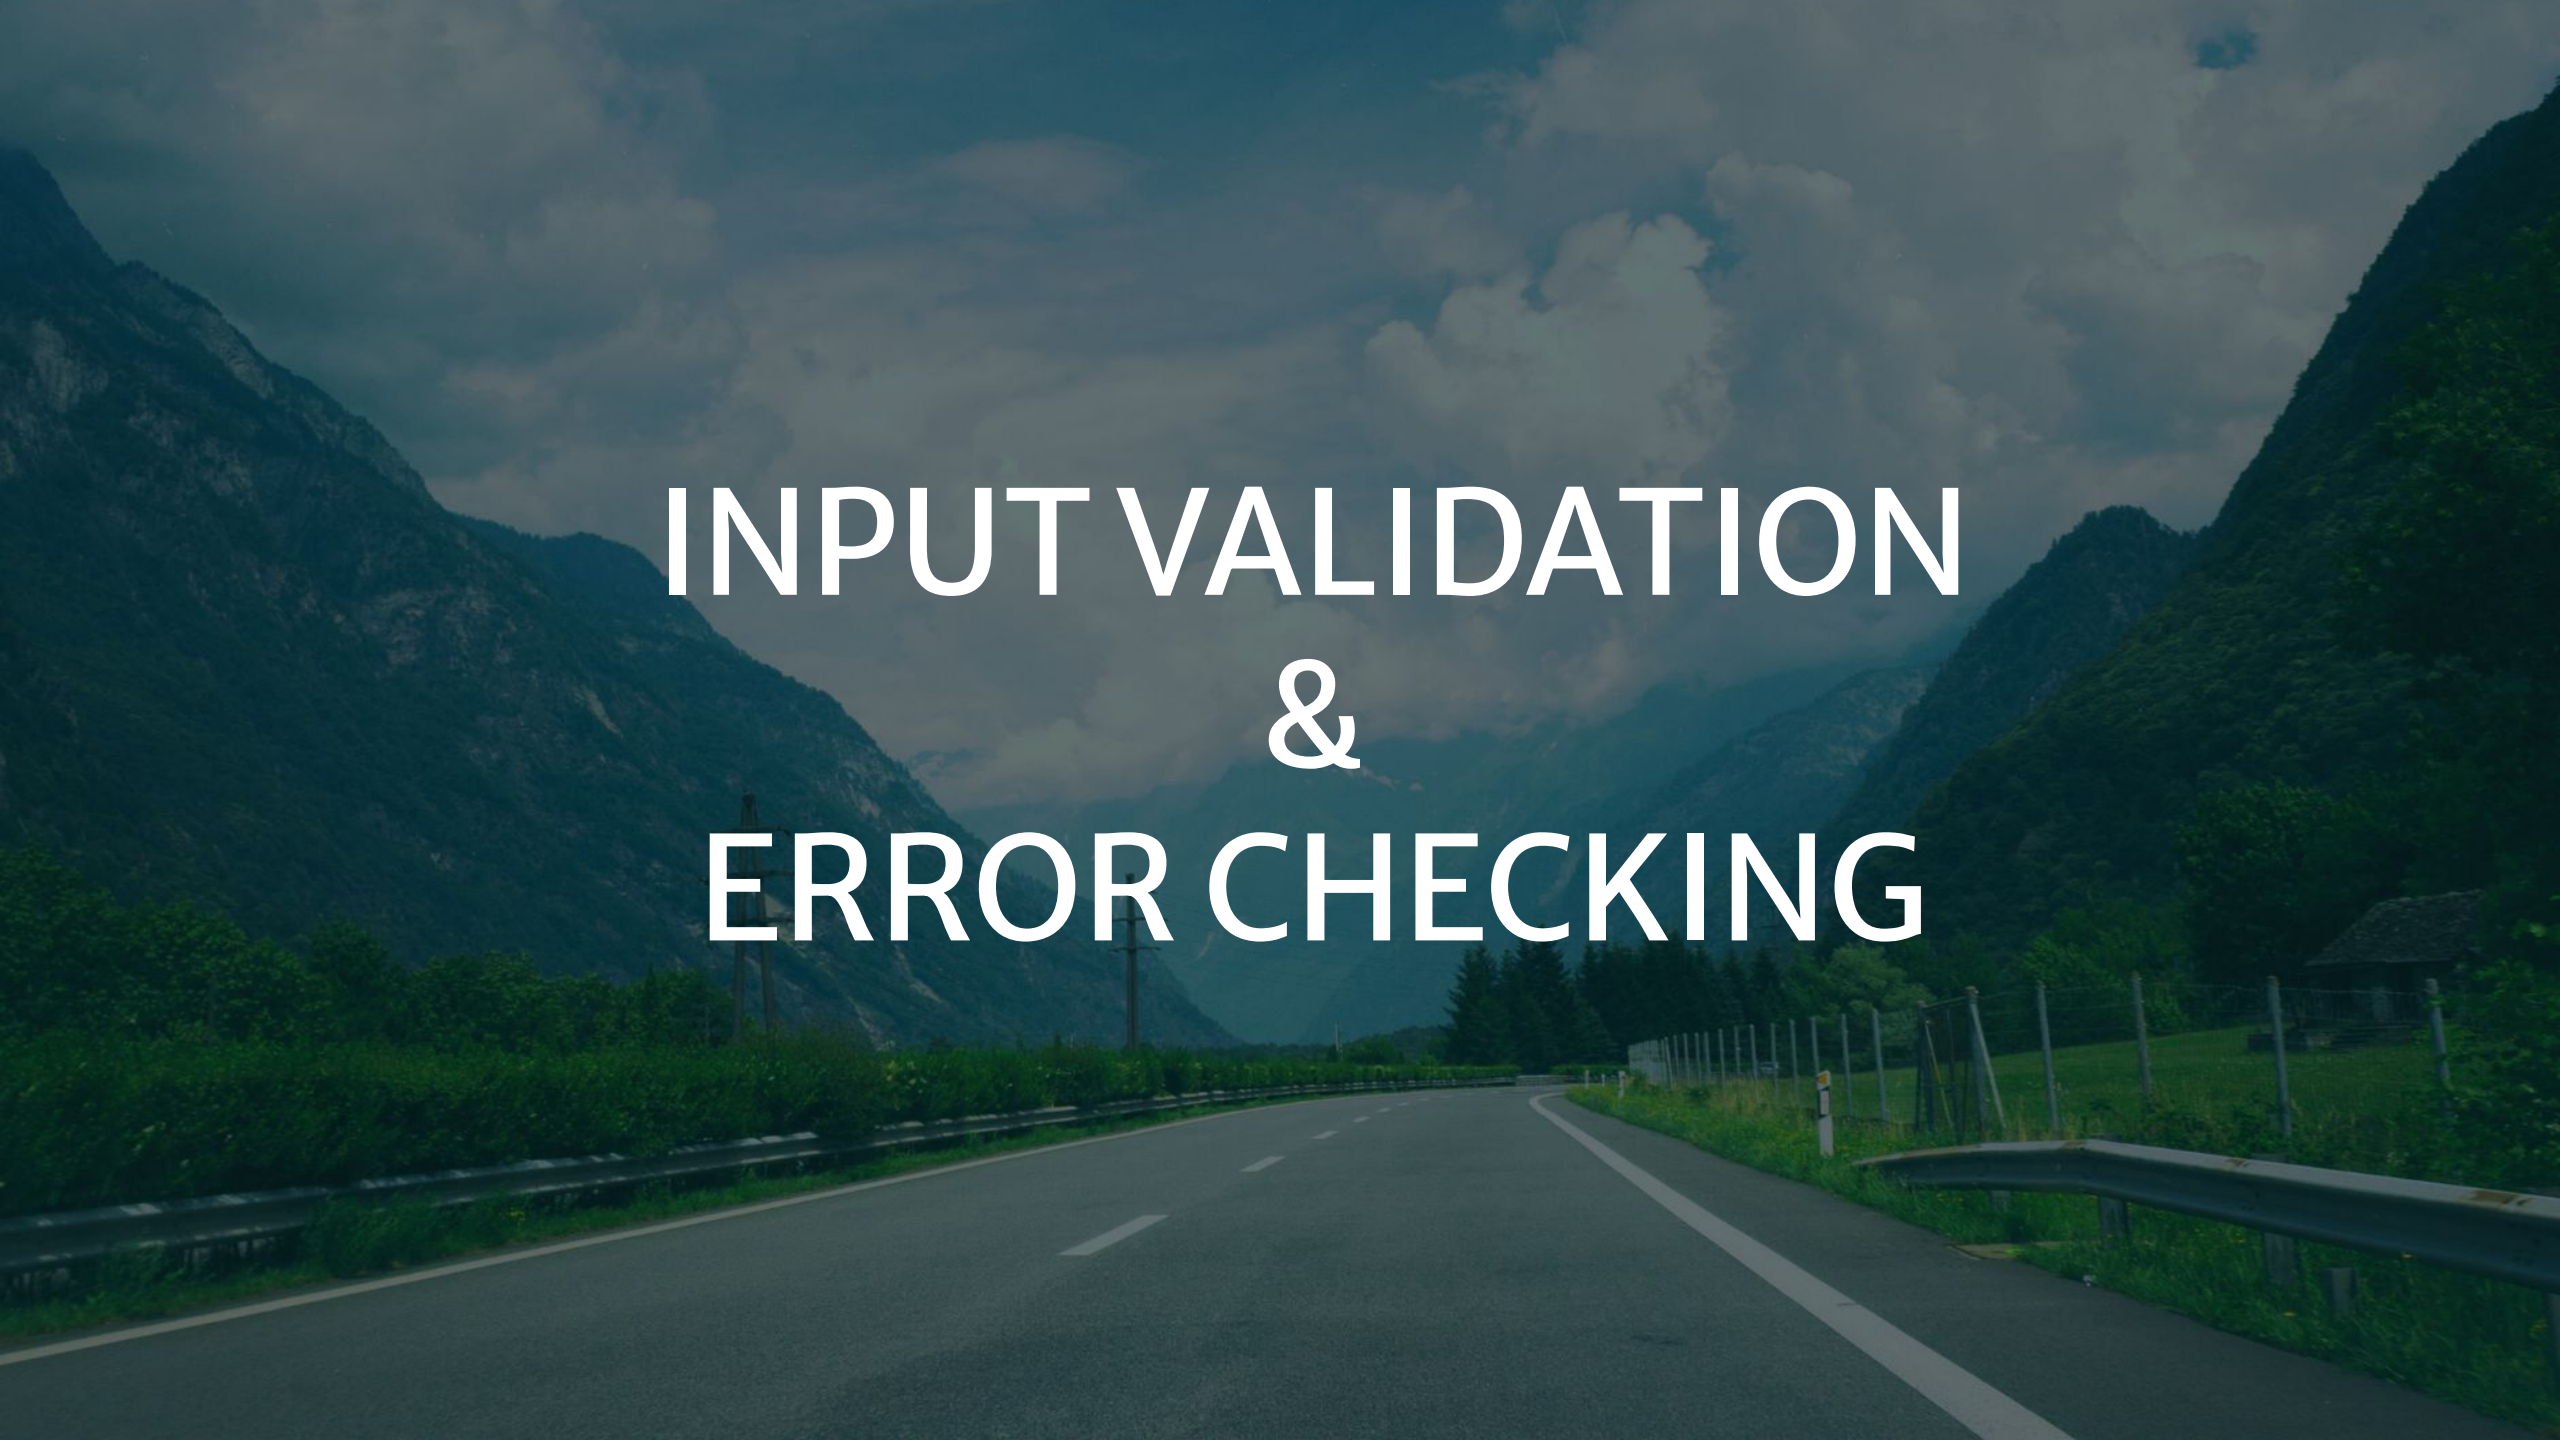

USER MANUAL (OPTION 1 AND 2)

Option 1

Users can access the ordering system, add or remove items, proceed to checkout, make payment, and choose to continue or exit the program.

Option 2

Users can create a new order or exit the program after accessing it through Option 1.

A scenic mountain road with a road sign. The road is paved and curves through a valley with steep, forested mountains in the background. A road sign with a white arrow pointing right is visible on the left side of the road. The sky is overcast with grey clouds. The overall tone is dark and moody.
